Full Name: Varun Sharma

Assignment number and name: Task 0 – AWS Account Setup

Submission date: 26 June 2026

AWS Region Used: us-east-1(N. Virginia)

**Task – AWS Account Setup & Security Configuration**

---

**Objective**

Create an AWS Free Tier account, secure it with Multi-Factor Authentication (MFA), and configure billing protection to prevent unexpected charges.

---

**What You Need To Do**

Visit aws.amazon.com and create a new account using your email.

Select Basic Support – Free plan.

Log in as the root user.

Note your AWS Account ID from the top-right dropdown menu.

Go to:

Billing → Billing Preferences

Enable:

- PDF invoices
- Free Tier usage alerts

Save preferences.

Go to:

Billing → Budgets

Create Budget → Use a template → Zero spend budget

Enter your email and create the budget.

Go to:

IAM → Dashboard

Add MFA for the root user.

Select Virtual MFA device.

Scan the QR code using Google Authenticator.

Enter two consecutive codes to activate MFA.

Log out.

Log back in as root user and confirm AWS prompts for MFA code.

Go to:

IAM → Dashboard

Confirm Security Recommendations section shows MFA as complete.

Free Tier Notice:

IAM and Billing services are free and have no usage charges.

---

**Deliverables**

Screenshots of:

- AWS Account ID
- Zero-spend budget confirmation
- MFA enabled on root account
- IAM Dashboard showing MFA completion
